Symbaloo EDU is a bookmarking or visual resource management tool specifically designed to make accessing websites and digital resources easy and appealing for students of all ages. It is particularly effective for sharing teacher approved sites with elementary and middle school students. Gone are the days of loading needed websites on every student computer or having students try to type in lengthy and complex URLs! Teachers can simply and easily link a website or digital resource to Symbaloo and it will immediately be available on any device with internet access.

Diigo (Educator Account) is a robust bookmarking and resource management tool designed for teachers and older students to collect, tag, and share online resources. Annotating webpages and PDFs directly while browsing online and organizing links, references, and personal input is a snap! Sharing websites and research with classmates and peers that can be accessed from any device with internet access has never been easier!
